For Faculty and Staff

July 2, 1986

## SUNCOM numbers may change

The State University System's long-distance telephone network, known as SUNCOM, is being upgraded between now and Dec. 1 and in the process some SUNCOM telephone numbers will change.

The instructions from Tallahassee say: "If you dial a SUNCOM number as currently listed in the State of Florida Telephone Directory and reach a recording saying the number is no longer in service, call one of the State of Florida information operators for the new number."

The Orlando-Orange Regional Service Center operator has a SUNCOM number 344-6000, or local number 423-6000. Help is also available from a Winter Park operator, SUNCOM 378-6933, or local 628-6933.

Because of SUNCOM number changes, the next State of Florida telephone directory will be distributed in November as a combined 1986-1987 issue. This edition will reflect all SUNCOM number changes through Dec. 1.

Users are advised that they will be notified several weeks in advance of any change made to the user's SUNCOM number. If the SUNCOM number at your location is going to change then you should notify frequent SUNCOM callers of the new number and the date of change.

## New provost: Richard Astro

*Emerging institution in an emerging community*  
*'It's exciting!'*

Dr. Richard Astro, Dean, College of Arts and Sciences, Northeastern University, will become UCF's Provost and Vice President of Academic Affairs in mid-August, succeeding Dr. Leslie Ellis, who will return to classroom teaching duties he had requested last fall.

Astro, 45, was offered and accepted the position last week following his second visit to UCF. UCF proved attractive, he said, because of the opportunities and possibilities an emerging institution creates. "It's especially exciting," he said, "when the urban community an institution serves is evolving and developing at the same time."

President Trevor Colbourn, noting the care and energy which the Search Committee members invested in the selection process, said Astro's appointment is "an altogether fitting conclusion to their hard work." Colbourn said UCF will obviously benefit from Astro's vigor, sensitivity and experience. "Les Ellis has established a strong academic foundation on which his successor can build," Colbourn added.

Astro earned a PhD degree at the University of Washington and has served as Professor of English and Dean at Northeastern since 1978. He moved there after holding a variety of teaching and administrative posts at Oregon State University over a 12 year period. Astro's academic specialty is 20th century American fiction.

Born in New York City and schooled in Cleveland during his pre-college years, Astro crossed the continent to earn a BA

DR. RICHARD ASTRO  
...UCF's new provost

at Oregon State University and later back-tracked through a time zone to gain an MA at the University of Colorado.

Astro said his arrival at UCF will be marked by "a lot of listening and studying and as little talking as possible" as he gains insights into how UCF differs from Northeastern, a private institution of about 35,000 FTE students with the world's largest cooperative education program. He said he hoped to acquire knowledge of the student body through the firsthand experience of teaching an introductory English composition course.

A commitment to excellence in the development of the entire University would be the overriding focus of his efforts, Astro said. "Throughout my professional life, I've been associated with institutions whose main strengths have been in professional programs, yet sought to achieve the delicate, healthy balance in preparing people for life as well as careers."

Astro, and his wife Betty, are parents of a daughter, Kelly who will be entering seventh grade. Acknowledging that he and the family will miss the New England seasons, "except for January in Boston," Astro said the Florida climate appeals to the family's outdoor interests.

## IST moves into new home, readies for full service

The Institute of Simulation and Training christened its first centralized home on campus last week, combining it with an all-day advisory board and public meeting.

The christening of the 5,000-square foot modular building located in front of the Physical Plant compound was the last item on the day's agenda. Talks to bring

representatives of industry and the military up to date and board deliberations took place in the President's Board Room of the Administration Building.

President Trevor Colbourn explained that the state allocated a quarter of a million dollars a year earlier and made a similar commitment to IST this year. He said that the seed money from the state

opens the window for an exciting future and that the University is committed to making it happen.

He was preceded by Provost Les Ellis who said, "UCF acknowledges its interests are inseparable from the interests of Central Florida," and was followed by Vice President for Research Lou Trefonas, who pledged, "We are going for-

ward and this Institute will be a success."

Director Wei Chen and his acting associate director, Ernie Smart, explained IST's organization that now has a staff of 50 and involves 15 to 18 faculty, plus graduate students, in projects that serve military and industry needs.

Smart noted that the institute had just  
(Continued on Page 4)

## Computer Science fills Millican eminent scholar chair

The \$1-million endowed chair for an eminent scholar in Computer Science will be filled in August by Dr. Narsingh Deo, internationally known for his work on fifth generation computers and combinatorial computing.

Deo, of Washington State University where he has been on the faculty as a full professor since 1977, was invited to consider the post last February and formally accepted last week. The chair is named in honor of Dr. Charles Millican, UCF's first president and was funded in 1983.

The research professor was born in India and received his bachelor of science degree with highest honors from Patna University. He earned a degree in electrical engineering from the Indian Institute of Science in Bangalore.

Deo holds a master's degree in electrical engineering from the California Institute of Technology, Pasadena, and his doctorate, also in electrical engineering, from Northwestern University, Evanston, Ill.

He was head of the computer science department at Washington State from

1980 to 1983, and before he joined the Pullman, Wash., school he was professor and head of the computer center and computer science program at the Indian Institute of Technology, Kanpur, India, for six years.

Deo was with the Jet Propulsion Laboratory, Pasadena, as senior research engineer and member of the technical staff for five years and spent three years with the Burroughs Corporation in Pasadena.

Deo has also taught at the University of Nebraska; California State University, Los Angeles; UCLA, and the University of Illinois Urbana.

His recent work has been funded by various agencies, including the National Science Foundation, U.S. Army Research Office, the U.S. Department of Transportation and the Washington Technology Center.

Holder of several U.S. patents in computer hardware and a recipient of NASA's Apollo Achievement Award, Deo has published over 50 research papers and four textbooks. The books have been translated into several languages, including Russian and Polish.

Computer Science Department Chairman Amar Mukherjee said he has known Deo professionally for more than 10 years and that members of the search committee met him during a conference in Boca Raton in February, leading to an interview on campus with the full committee in March.

NARSINGH DEO

Mukherjee said: "Having Dr. Deo on our faculty will strengthen our PhD program in Computer Science significantly and enhance our research capabilities."

At UCF this fall Deo will teach one course: "Algorithms for Parallel Computation, Design, Analysis and Implementation." He will also conduct seminars and do research in his field of particular interest.

Charles Hughes, who chaired the search committee, expressed pleasure that a long and difficult search brings an outstanding person in the field to UCF.

"Computer Science is a young discipline so there is not a large pool of senior scientists from which to choose. UCF found itself in competition with other universities, such as the University of Texas and its 10 endowed chairs in Computer Science, and with industry where senior computer scientists are paid double and triple what universities can offer."

"In light of this, the hiring of Dr. Deo was a major accomplishment and one of which UCF can be justly proud," Dr. Hughes said.

## GRANTS AVAILABLE

(The following information is repeated from the last issue because of the unusual new opportunities to involve faculty that have not been involved in research before. The response since the last notice has been the greatest since I have begun preparing these columns--Bruce Furino.)

**"RESEARCH OPPORTUNITIES in Economics, Geography and Regional Science, History and Philosophy of Science, Law and Social Sciences, Political Science, Sociology, Measurement Methodology and Data Improvement, and Decision and Management Science."** (NSF) The goal of the program is to develop basic scientific knowledge of human social behavior, interaction, and decision-making and also of social and economic systems, organizations and institutions. In addition to research proposals, the program will consider proposals for doctoral dissertation support, research conferences, the acquisition of specialized research and computing equipment, group international travel, and data collection. Programs included are:

**ECONOMICS** — The program supports basic and applied research designed to improve understanding of the processes and institutions of the U.S. economy and of the world system of which it is a part. Research areas currently supported are general economic theory, economic dynamics; applied microeconomics, macroeconomics, and public finance; international economics; industrial organization; mathematical economics; economic history, and labor economics.

**GEOGRAPHY AND REGIONAL SCIENCE** — The program promotes a deeper understanding of the causes and consequences of geographical differences in economic, social, cultural, and physical phenomena; of the ramifications of location; location of the interconnections and interactions among places and regions; and of the interrelations between man and environment.

**MEASUREMENT METHODS AND DATA IMPROVEMENT** — Supports projects to improve the scientific quality and accessibility of social data, with emphasis on improving survey data and on increasing the research usefulness of federal statistical data.

**SOCIOLOGY** — Supports research on problems of human social organization, demography, and the processes of individual and institutional change. Included is research on decision-making, organizational change, social movements, urbanization, labor force processes, resource allocation, reward distribution, social networks, socialization, and the sociology of science.

**HISTORY AND PHILOSOPHY OF SCIENCE** — Supports research having clear and direct relevance to the understanding of science (including the physical, biological, and social sciences), scientific change, and technological development.

**POLITICAL SCIENCE** — Supports research on the political forms and processes by which societies coordinate their activities through governments, including studies of governmental institutions and their effects on social life, the effects of structural factors on political participation, conflict and political instability, and how political processes are modified in response to social and economic change.

**LAW AND SOCIAL SCIENCES** — Supports social scientific research on law and law-like systems of rules. Included are studies of dispute processing, administrative and judicial decision-making, social control, compliance and deterrence, the regulatory role of law, legal and social change, and related inquiries on the relationship between legal processes and other social processes.

**DECISION AND MANAGEMENT SCIENCE** — Supports fundamental research on decision-making, management, and operational processes to build a body of knowledge that can be drawn upon to improve practice.

ALL THE ABOVE HAVE TARGET DUE DATES OF AUG. 15 AND JAN. 15.

PLEASE NOTE: DSR will establish an internal peer review committee for applicants who wish to have their proposals reviewed in-house prior to submission to NSF. In order to meet the Aug. 15 target date (for submission to NSF), please contact DSR no later than July 7 if you desire an in-house review. This review procedure has been initiated on a trial basis and only for applications due to NSF on Aug. 15.

For further information, please contact Bruce Furino, x2671.

### WORTH REPEATING

Work is less boring than pleasure

—J. Pieper

## Official memoranda

To: Employees and/or Spouses near age 65  
From: Maxine Bowers, Acting Benefits Manager  
Division of Personnel  
Subject: Changes in Health Care Coverage

Prior to May 1986, employee-sponsored group health insurance plans were the primary payors of health care services for insured employees and/or spouses age 65 through 69 and Medicare was the primary payor for employees and/or spouses age 70 or over. (A primary payor pays covered health insurance claims first while a secondary payor may be liable for covered services not paid by the primary payor.)

Effective May 1, 1986, Medicare will no longer be primary payor for insured employees and/or spouses age 70 or over.

As a result of this change, it is necessary that you and/or your spouse complete a "Primary Health Coverage Written Election Form" and return it to Personnel, ADM 230, as soon as possible. (Most of you have completed a similar form; however, this change in law requires a new form to be completed.)

Forms and letters of explanation were mailed last week to all affected employees. If you failed to receive our mailing, please call the Benefits Section of Personnel, x2771, for a copy.

By way of this form, you and/or your spouse may elect your current health plan (State Health or your HMO) as primary payor and Medicare as secondary payor. If you and/or your spouse prefer to select Medicare as primary payor, your present employer-sponsored group health plan must be terminated. Once such coverage is cancelled, re-enrollment at a later date would depend upon satisfactory proof of insurability for State Health or upon meeting the specific requirements of the individual HMO you select.

Insured employees and/or spouses who will soon become age 65 and are eligible for Medicare should contact their nearest Social Security Office to enroll in Part A (hospital coverage) of Medicare prior to becoming age 65. You need not enroll in Part B of Medicare at that time if you and/or your spouse elect your State Health Plan or HMO Plan as primary payor.

Prior to retirement, an employee age 65 or over must contact Social Security to enroll in Part B of Medicare.

If you and/or your spouse are age 65 or over but are not eligible for Medicare coverage, please complete Part I and Part II of the "Primary Health Coverage Written Election Form" and return the form to Personnel, ADM 230.

Please do not hesitate to call me (x2771) if you have any questions regarding the Written Election Form, your health options or your current health care coverage.

★ ★ ★

To: State Health Insurance Participants  
From: Maxine Bowers, Acting Benefits Manager  
Division of Personnel  
Subject: Change in Chiropractic Benefits

Effective May 1, 1986, the chiropractic organization known as the Florida Preferred Provider Organization (FPPO) is no longer in existence. Charges for all covered chiropractic services received on or after May 1, 1986, must, therefore, be reimbursed by the State Health Plan on the non-FPPO provider basis of 50 percent of the chiropractor's charge or 50 percent of the Approved Fee Schedule Allowance, whichever is the lesser, subject to the \$100 calendar year deductible and limit of 26 visits or \$400.

While this action has the immediate effect of temporarily decreasing your benefit, new beneficial changes to your chiropractic coverage, approved during the recent legislative session, will be announced very soon.

If you have any question regarding your current chiropractic coverage, please call me at x2771.

★ ★ ★

To: All University Personnel  
From: Dick Scott  
Director of Business Services  
Subject: Inventory of Printing and Reproduction

On Monday, June 30, the Print Shop will be closed from 8 a.m. to 5 p.m. and Duplicating Services located in the Administration Building, room 262, will be closed from 8 a.m. to noon for the fiscal year-end inventory.

Please make note of these times and plan accordingly.

★ ★ ★

To: All Interested Parties  
From: UCF Computer Store  
Computer Services Department  
Subject: Hard Disk Backup

The Computer Store now offers a hard disk backup service. The service costs \$10 each time you want your hard disk backed up. You will also be required to buy a tape for \$29.95.

Please contact Kevin Barnhill at x5605 to schedule your hard disk backup.

Publication of these memoranda and announcements about University policy and procedure constitutes official notice to faculty and staff.

To: Personal Computer Displaywrite 3 Users  
From: Etta Jean Smith, Office Systems  
Subject: Personal Computer Scan Capability

The Office Systems Center in the Administration Building, AD 150, recently acquired an optical character reader for the personal computer. Using this device, the center can read a typewritten document into a Displaywrite 3 document created and stored on a diskette for the personal computer. The document can then be edited and printed as needed without rekeying.

The center is offering this service ONLY to personal computer users who run Displaywrite 3 word processing software. The charge for scanning documents is as follows:

50¢ per page	1 to 25 pages
35¢ per page	26 to 100 pages
35¢ per page	over 100 pages

\$1.50 per diskette if the center must provide the formatted diskette on which the documents are stored. If the user provides the storage diskette, it must be formatted for the IBM personal computer.

Anyone interested in this service should bring the typewritten document to the center for review by one of the center supervisors, Linda Hall or Jerry Byrd to determine readability.

★ ★ ★

To: All UCF Employees  
From: Mark Roberts, Director  
University Personnel Relations  
Subject: Open Posting Announcement

One of the most immediate beneficial aspects of the "Path to Excellence" legislation is the ability to advertise employment opportunities, in certain classes, on a year-round basis. As of July 7, 1986 the UCF vacancy listing will begin advertising the following classes with "open" application deadlines:

- \* Clerk
- \* Clerk Specialist
- \* Senior Clerk
- \* Clerk Typist
- \* Clerk Typist Specialist
- \* Secretary
- \* Secretary Specialist
- \* Administrative Secretary
- \* Executive Secretary
- \* Word Processing Systems Operator II
- \* Word Processing Systems Operator III
- \* Staff Assistant
- \* Administrative Assistant I
- \* Fiscal Assistant I
- \* Fiscal Assistant II
- \* Data Entry Operator
- \* Computer Operator I
- \* Computer Operator II
- \* Computer Operator III
- \* Computer Program Analyst I
- \* Computer Program Analyst II
- \* Custodial Worker
- \* Custodial Supervisor I
- \* Storekeeper I
- \* Storekeeper II
- \* Groundskeeper
- \* Senior Operating Engineer
- \* Maintenance Mechanic
- \* Electronic Technician II
- \* Classroom Teacher I
- \* Law Enforcement Officer
- \* Law Enforcement Corporal
- \* Law Enforcement Sergeant

As a result of this action, the past requirement to advertise individual vacancies in these classes for a minimum of 10 working days will be eliminated. However, those positions in which preferred qualifications have not been posted will have to be placed in the normal employment process which requires weekly postings. Upon receipt of a recruitment request, the Division of Personnel will begin the process of referring top ranked applicants for departmental interviews. The provisions of the various collective bargaining agreements will continue to be followed with the result that, for those classes marked above with an "\*", staff members seeking reassignment or promotion will be referred for interview first and, if necessary, others will be referred out later.

It is anticipated that the ability to continually announce position vacancies will prove to be of significant value. Most obviously, it will save at least 10 working days of advertising time. In many cases open posting will also save as many as five additional working days that, in the past, were spent awaiting the production of a UCF vacancy listing. Of even greater value to the University, the year-round announcement of employment opportunities in these classes should increase the size of the qualified applicant pool. Please forward any questions on this change to Jim Cherepow, Dorris Cannon, or myself at x2771.

## Welcome Newcomers!

**Joanne Steel** (secretary specialist/Music) was born in Queens, N.Y., and now lives at Orlando and last worked for United Way. Her husband's name is Robert and she likes swimming, boating, snorkeling and skiing.

**Christine M. Sargent** (secretary specialist/Statistics) became a Career Service employee by way of OPS. She also has been a student and earned a degree in computer science, with a minor in statistics. She is a native of Dennison, Ohio, and lives at Orlando.

**Leslie R. Webb** (custodian/Housing) was born at Tilbury, Essex, England, and now lives at Oviedo. He formerly worked for Kematic Inc. His wife's name is Alice and his hobbies are gardening and travel.

**Grace Nora Lee Morgan** (custodian/Building Services) comes from Benton, Tenn., and now lives at Geneva. Her last job was also on campus, as OPS in Housing. Golf is her special interest.

**Terri Langford** (community health nurse/Student Health Services) is helping organize the new wellness program. She earned her nursing degree at the U. of Virginia and worked at Shands Hospital, Gainesville. A native of Maryland, she and husband, Larry, live at Winter Springs with their three sons, Bo, 13, Sam, 10, and Ryan, 3.

**Donald Rader** (groundskeeper/Physical Plant) used to work for the Hyatt Grand Cypress Hotel. He was born at Columbus, Ohio, and now lives at Orlando.

**Michael Horn** (groundskeeper/Physical Plant) can't keep his hobby a secret. He plays music at night. A native of Marion, Ind., he calls Orlando home with wife, Trina, and Heather, age one-plus. His last job was with Winn Dixie.

**Cora L. Griffin** (senior word processing systems operator/Computer Services) is a native of Tallahassee, attended Florida A&M, and worked for the Department of Education at Tallahassee. She did broadcasting for a radio station and belonged to Gamma Sigma Sigma national service sorority. She lives at Apopka with LeNard Charles, age 3.

**Ernest A. Smart** (research associate/IST) comes from Saco, Maine, and earned his BS in Education at the Uni-

versity of Maine. He formerly worked for Hay Systems Inc. He and wife, Doris, have two grown daughters, Cheryl and Pam. His hobbies are tennis, raquetball and fishing.

**Raymond M. Landry Jr.** (assistant professor/Accounting) was born at Bronxville, N.Y., and has been an instructor at the University of Arkansas. He earned a BS at Clemson and an MBA at The Citadel. Golf is his outside interest.

**Barbara D. DeVane** (visiting assistant professor/Finance) earned a BS from Washington U., an MA from Rice and has a PhD pending from the U. of Florida where she last worked as a graduate assistant. A native of Nashville, Tenn., she now lives at Orlando with husband, Gary, and children, Margaret, 13; Alexis, 12; and Drew, 7.

**Karen J. Rosser** (staff assistant/Brevard Campus) worked for Brevard Community College and Brevard County School Board previously. She and husband, Dave, live at Rockledge with children, Dennis, 21, and Terry, 16. This native of Defiance, Ohio, was president of Rockledge High "Raider" Quarterback Club in '85 and '86.

**Patricia M. Fandt** (assistant professor/Management) was born in New Jersey and lived last at Bryan, Texas. She earned her PhD at Texas A&M, her MBA at the U. of West Florida and her BS at the U. of Georgia. She has been employed by West Florida, 3M and Procter & Gamble. Her husband's name is James Danos. Scuba diving and sailing are her favorite hobbies.

## Strand retires, to live in Iowa

Don Strand, equipment manager for Recreational Services, has reversed the normal procedure for people entering retirement.

After his last day at work last week Strand loaded up his rental truck and headed north. On annual leave just before retiring he bought a house in Gilman, Iowa, four miles from where he farmed most of his life.

Nineteen years ago Strand retired from farming and moved to Florida, working first in the Fort Lauderdale area. Ten years ago he joined the UCF staff and dispensed athletic equipment to employees and students who take advantage of the opportunities to exercise on campus.

Last Wednesday Rec Services Director Loren Knutson arranged a reception for Strand, 65, so his many friends could drop by for a final visit.

## Employee of the Month

# Barbara Stevens finds joy in helping students

Sometimes gray hair can be an asset. Like when you're at the front desk in an academic office and most of the people approaching you are students.

And when it is worn very neatly by Barbara Stevens, and everything else about her telegraphs the message: "Mother!" and "Whatever your problem, we can handle it. And you're going to feel good about it."

Stevens is one of those people who chance into a position and find it is just made for them—and vice versa. Having become thoroughly tired of keypunch operating—which she did for 13 years—

dealing with humans and their problems became infinitely more interesting.

And it became a pleasure to Stevens and the people she works with in the English Department office to find she deals so well with people. Irene LeBlanc, her supervisor, observed, "Barbara is very patient with students and it gives them a nice warm feeling when they leave."

And her department head, Stuart Omans, appreciates her. He recently approved the upgrading of her job from clerk-typist to secretary specialist and added to her duties the work required on Richard Adicks' graduate program.

Barbara McCullough was born in Long Island City, grew up in Queens, met Harry Stevens at a dance and when they were married moved to Tenafly, N.J., where he worked as an automotive machinist. There Brian, now 21, and Debbie, 18, were born.

And there in 1974 Harry decided he wanted to live in a warmer climate and Barbara decided she was ready for the adventure of moving. After 10 years in Albuquerque Harry decided that wherever snow settled on the ground was too cold and they headed for Vero Beach.

Along the way they discovered Orlando and have stayed close, stopping for a year at Union Park until they located two acres fenced in at Christmas.

The city girl who used to be afraid of dogs now is surrounded by dogs, cats, parrots and even a pet bull that thinks he's a dog. The whole family loves their Florida lifestyle. Brian has his own trailer, and Debbie, married, also lives on the Stevens' property, in another trailer.

Harry has changed his kind of work a little. He installs inboard engines in new boats. Barbara met Mary Stines, Payroll supervisor, through Weight Watchers, and was given the idea of applying for a job at UCF. She has been an employee since March of 1984.

She joined the Weight Watchers club on campus and proudly announces a 30 pound loss in 18 weeks. "Harry likes it, too!"

UCF has provided a pleasant change for Barbara Stevens and Florida a similar change for the Stevens family. "My only regret is that we didn't move here 10 years earlier," she said.

**BARBARA STEVENS**  
...patience wins friends

## Official memoranda

**To:** All Faculty  
**From:** Vice President L.M. Trefonas  
**Subject:** Faculty Travel Funding

The Faculty Travel Committee has met and has awarded the following travel funds for the April-June 1986 period.

TOTAL APPLICATIONS RECEIVED = 36

TOTAL APPLICATIONS FUNDED = 32

TOTAL AMOUNT FUNDED = \$8,575.

The Faculty Travel Committee has awarded the following travel funds for the FY 85-86, July 85-June 86 travel periods.

TOTAL APPLICATIONS RECEIVED = 113

TOTAL APPLICATIONS FUNDED = 89

TOTAL AMOUNT FUNDED = \$24,503.

Travel Requests are now being accepted for the July-December 1986 travel period. Requests must be submitted on the form "Application for Funds to Support Faculty Travel" which is available from Ruth Paige in my office. ADM 243.

**To:** All Departments  
**From:** Dick Scott  
Director of Business Services  
**Subject:** Postal Services and Telecommunications

Postal Services has been moved to a new location in the

Publication of these memoranda and announcements about University policy and procedure constitutes official notice to faculty and staff.

Print Shop/Central Receiving complex. The telephone number has not changed. You may still reach Mrs. McCollum and her staff at x2400. The hours have been expanded to 7 a.m.-5 p.m. to better serve you. We will also remain open during lunch for your convenience.

Telecommunications will be moved into the area previously occupied by Postal Services.

If you have any questions, please call me at x2624. Your patience during these moves is appreciated.

★ ★ ★

**To:** All Departments  
**From:** Tim Carroll  
Business Services  
**Subject:** Business Reply Mail

Please be advised that the U.S. Postal Service has revised the design for Business Reply Mail. If you are anticipating a distribution of mail containing postage paid return envelopes or cards, please contact Mr. Ed Rodriguez in the Print Shop at x2277. He has the proper design authorized specifically for UCF by the U.S. Postal Service. Even if you wish to have your return mail printed off campus, you must have your layout reviewed by Mr. Rodriguez.

Failure to use the proper layout and bar-coded information will prevent your return mail from being processed. Your cooperation in this matter is greatly appreciated.

## Sergeant Stout gets promotion

Sergeant Arthur Stout was promoted to the rank of lieutenant as of June 18, Director of Public Safety and Police Ron Seacrist announced. Stout will supervise the Uniform Patrol Division and the Student Escort Patrol Service.

The new lieutenant was employed by the University Police Department on Feb. 22, 1972 and has been a patrol sergeant for eight years.

## ON EXHIBIT

UCF Art Department has organized a traveling exhibition of 50 Henry Moore maquettes that may be viewed at Loch Haven Art Center through July 20. Moore, native of England, came to international prominence in the 1940s for sculpture identified as surrealism and abstraction. His maquettes are hand-sized models he made to conceive and refine ideas for larger castings. The free exhibition runs 10 to 5 Tuesday through Friday, noon to 5 on Saturday, and 2 to 5 on Sunday.

## Employment Opportunities

UCF is an Equal Opportunity /  
Affirmative Action Employer

## Music education scholarship open

Music educators invite eligible appli-  
cants for a new graduate scholarship  
that will be available this fall.

The scholarship, presented to UCF in  
the name of the late Nelson McGeoch,  
of Winter Park, has been established for  
outstanding graduate students majoring  
in music education, said Professor Mary  
Palmer, who is coordinating the award.

In order to be considered, applicants  
must possess a baccalaureate degree  
from an accredited college or university,  
must have a Florida certification in  
music education and meet test score  
requirements on the Graduate Record  
Exam. Applicants must submit three let-  
ters of reference, one from his or her  
immediate superior and show evidence  
of successful experience in teaching  
music.

### The UCF Report

The UCF Report is the University of Central  
Florida's official publication, whose purpose  
is to inform the University community  
through announcements, official memoranda  
and items of general interest. Publication  
and announcements and official memoranda  
about University policy and procedures in  
The UCF Report constitutes official notice to  
faculty and staff. The UCF Report is a weekly  
publication most of the regular academic year  
and biweekly during the summer sessions, at  
a cost of \$180 per issue, or 7.5 cents per  
copy, paid for by the Office of Public Affairs,  
ADM 395-J, x2504.

Copy submitted on or before Thursday  
noon of the week before publication  
receives handling and space priority. Copy  
is accepted after this deadline but is  
subject to editing or delay until the  
succeeding publication date.

## Books for UCF

UCF netted 250 microcomputer handbooks from Stromberg-Carlson, the latest in a number of contributions to UCF by the Lake Mary plant. On hand for the presentation (left to right) Kevin Reis, Astronet representative at the firm; Rex Brown, associate director of development at the Library; Bill Pizzi, plant operations director; Irene Korhnak, UCF Friends of the Library president; George Markward, Stromberg systems test technician and Ratan Guha, associate professor of Computer Science.

## IST moves into new home

assembled in its new home after having  
personnel scattered in different buildings  
and trailers, "but if we get two more peo-  
ple we will have to go back into trailers."

He said the success of the Institute  
hinges on its personnel, who have been  
selected through a lengthy process to be  
sure they are the right people to solve  
problems for the Department of Defense  
and industry. He advised there would be a  
lot of movement at the lower level to get  
specific skills to solve specific problems.

Vice President for University Relations  
Bob McGinnis indicated the eminent  
scholar's chair planned for IST could be  
handled in a flexible way, either on a  
permanent basis, or on a rotating basis.  
He said \$230,000 in pledges and cash  
are in hand toward the \$600,000  
required to tie up state funds to make a \$1  
million endowment.

IST incorporates four on-going military  
programs and an academic information  
program on the drawing board. The older  
ones include the Marine Corp's Tactical  
Training System, the Navy's and the  
Army's Training Simulation programs  
and Training Data Analysis Center  
(TDAC).

From the faculty side, Charles Hughes  
from Computer Science and Chris Bauer,  
Computer Engineering, have been devel-  
oping future technology in Ada, the com-  
puter language that will be required in  
Navy contracts beginning in 1987.  
Hughes said his research of the new lan-  
guage has provided him and the Univer-  
sity with a much stronger bond with  
industry.

Bob Martin and Mike Harris, two other  
faculty researchers, demonstrated their  
development of an oculometer, a device  
to use the electrical impulses of the eye to  
direct action on a computer screen. Mar-  
tin said the idea has possible uses for the  
military, and also as a tool to help para-  
plegics help themselves.

Richard Gilson, Psychology; Gary Orwig,  
Instructional Programs; and Mike Moshell,  
Computer Science, offered further observa-  
tions on the synergy between the Univer-  
sity and military/high tech industries  
centered in Florida.

At the request of industry representa-  
tives the University will prepare a clear-  
cut definition of the Institute, as well as a  
statement explaining its position within  
the Center of Excellence for the next  
advisory board meeting.

### Campus Calendar JULY 1986

- 7 Adult Community Education  
through July 13, x2123
- 15 Real Estate I  
\$135, through Sept. 23,  
x2123
- 26 CPA Review 1986  
\$495, UCF, through Oct. 26  
x2123.

## OFFICIAL To Spotlight the UCF BALLOT Employee of the Month

I nominate \_\_\_\_\_ to be  
UCF SPOTLIGHT EMPLOYEE OF THE MONTH. (Nominee must have been a  
Career Service employee for at least one year.) Any employee, including faculty  
and A&P, may nominate a candidate on basis of job performance, dependability,  
attitude, etc.

Reasons for your choice: \_\_\_\_\_

Cut out ballot and return to Winnie Brock, Purchasing, AD 360.

Signed: \_\_\_\_\_

## Classified

This is a free service  
to fulltime UCF employees

### CARS FOR SALE

1975 Dodge Dart, good condition,  
\$1000. 671-0189 after 4 p.m.

1975 Ford Courier with camper. Paid  
\$600, used once, \$400, negotiable.  
Must sell immediately. Call Alice at  
x3008.

Pontiac LeMans '74, auto, air, 2 dr., ps,  
pb, a.c., good condition. Call Jo, 273-  
6436 (please keep trying).

& return, M-F, 8-5. Becki x2108.

### FOR RENT

Chalet in NC mountains, a mile from  
the Blue Ridge parkway, fireplace.  
\$330.00 week. 628-4722.

## Yousef gets new retention pond research grant

Florida's trend toward urban growth  
is responsible for a \$75,000 research  
grant to Yousef A. Yousef, professor of  
Civil Engineering.

Yousef got the grant from the Florida  
Department of Environmental Regula-  
tion to extend a study he had done for  
the Florida Department of Transporta-  
tion for pollutant control through the  
use of retention ponds.

DOT was concerned with removing  
the harmful effects of heavy metals and  
organic compounds in storm drainage.

DER has the same interest, but with  
an added requirement. Because growth  
has jumped the price of land, develop-  
ers want to get the most benefit in the  
least amount of space.

Yousef's search will be for the most  
efficient configuration for retention  
ponds. The research will be carried out  
by studying existing ponds and models  
in the laboratory, he said.

## Young cheerleaders to train on campus

Eastern Cheerleaders Association will  
conduct a summer clinic for junior and  
senior high school cheerleaders on cam-  
pus July 31-Aug. 3.

Eastern's program includes all phases  
of cheerleading for all levels of expe-  
rience. Cheerleader coaches may attend,  
however, they are not required to do so.

For additional information, contact  
Eastern Cheerleaders Association, P.O.  
Box 475, South Hill, VA 23970 or call  
804-636-2000.
